ADHD-specific deviation vs other-NDD (78 conditions, shrunk)
Anxiety, stress & somatoform disorders
Mood disorders (depression, bipolar)
Asthma
Arthropathies & joint disorders (arthritis)
Sleep disorders (organic)
Male genital disorders
Chronic upper respiratory (rhinitis/sinusitis/tonsil)
Personality disorders
Conjunctivitis & conjunctival disorders
Soft tissue & muscle disorders
Headache & migraine
Other blood & spleen disorders
Obesity & overnutrition
Skin & subcutaneous infections
Visual disturbances & blindness
Hearing loss & other ear disorders
Otitis media & middle ear disorders
Urticaria & erythema
Substance-related disorders
Behavioral syndromes (eating, sleep)
Influenza & pneumonia
Conduction disorders & arrhythmias
Intestinal infections (gastroenteritis)
Disorders of skin appendages (acne/hair/nail)
Bladder & urethral disorders (cystitis, UTI)
raw δ
shrunk δ (90% CI); red = beyond μ

ADHD-specific deviation δ = p_ADHD − p_otherNDD
What the ADHD-vs-NT elevation is made of
Anxiety, stress & somatoform disorders
Chronic upper respiratory (rhinitis/sinusitis/tonsil)
Asthma
Hearing loss & other ear disorders
Obesity & overnutrition
Sleep disorders (organic)
Conjunctivitis & conjunctival disorders
Refractive errors
Mood disorders (depression, bipolar)
Otitis media & middle ear disorders
Soft tissue & muscle disorders
Dermatitis & eczema (atopic)
Mycoses (fungal infections)
Acute upper respiratory infection
Arthropathies & joint disorders (arthritis)
Influenza & pneumonia
Metabolic disorders (lipid, fluid/electrolyte)
Oral & dental disorders
Visual disturbances & blindness
Viral infections with exanthem/skin
Other blood & spleen disorders
Other & sequelae of infectious disease
Intestinal infections (gastroenteritis)
Disorders of skin appendages (acne/hair/nail)
Esophageal, gastric & duodenal disorders
shared NDD (p_other − NT)
ADHD-specific δ (shrunk)
